## **CLAIMS**

What is claimed is:

1. (Original) An airflow shroud for a moving-slider-type microactuator, comprising:

a frame portion having an opening suitable for exposing an air bearing surface of a slider for a disk drive, the frame portion surrounding the slider and a moving-slider-type microactuator coupled to the slider; and

an attachment portion adapted for attachment to a suspension of a disk drive.

- 2. (Original) The airflow shroud according to claim 1, wherein the frame portion has side portions forming the opening and a tapered shape between each side portion and the opening.
- 3. (Original) The airflow shroud according to claim 1, wherein between about 50 to 100 micrometers of the slider are exposed through the opening of the frame portion
  - 4. (Original) An airflow shroud for a moving-head-type microactuator, comprising:

A plate portion attachable to a slider having a movable-head-type microactuator; and a recessed portion corresponding to the moving-head-type microactuator of the slider.

5. (Original) A disk drive comprising an airflow shroud for a moving-slider-type microactuator, the airflow shroud including a frame portion having an opening suitable for exposing an air bearing surface of a slider for the disk drive, the frame portion surrounding the slider and a moving-slider-type microactuator coupled to the slider and an attachment portion adapted for attachment to a suspension of the disk drive.

HSJ920030072US1 Serial No.: 10/643,265 Examiner: Klimowicz, William J. 2 Art Unit: 2627

- 6. (Original) The disk drive according to claim 5 wherein the frame portion has side portions forming the opening and a tapered shape between each side portion and the opening.
- 7. (Original) The disk drive according to claim 5, wherein between about 50 to 100 micrometers of the slider are exposed through the opening of the frame portion.
- 8. (Original) A disk drive comprising an airflow shroud for a moving-head-type microactuator, the airflow shroud including a plate portion attachable to a slider having a moving-head-type microactuator, and a recessed portion corresponding to the moving-head-type microactuator of the slider.
